Studies

*Learning that shapes
who you are.*

Customized learning for your team that fits your schedule

Canadian Falls Prevention Curriculum[®]

If your organization works with older adults in long term care, acute care, home care or in the community, this self-directed course of between 10-15 hours, offered over 4 weeks, will help you and your team acquire the knowledge and skills needed to apply an evidence-based approach to the prevention of falls and fall-related injuries.

- The course can be customized to provide the best fit for your organization's specific role
- Our award-winning Distance Education team will ensure that individuals on the course feel that they are sharing the learning experience with their colleagues as they progress
- We will make the courses available for delivery when you need it
